

Arbeitsgruppensitzung Autoimmunbullöse Dermatosen

im Rahmen der ADF-Tagung 2019 in München-Garching, Raum 2050
Donnerstag, den 14.03.2019 von 9:00 bis 13:00 Uhr

09:00 **Begrüßung**
Michael Sticherling, Erlangen

Pathogenetische Aspekte von autoimmunbullösen Dermatosen

09:10 **Role and mechanisms of Dsg1 and Dsg3 in pemphigus skin blistering**
Jens Waschke, München

09:25 **RNA profiling of bullous pemphigoid patient skin**
Christian Schwarm, Lübeck

09:40 **Whole exome sequencing reveals characteristic mutations in patients with epidermolysis bullosa acquisita**
A. Fähnrich, Lübeck

Klinische Aspekte von autoimmunbullösen Dermatosen

09:55 **Bullous pemphigoid with the picture of acquired reactive perforating dermatosis**
F. Schauer, Freiburg

10:10 **T-cell responses against autoantigens of the skin in patients with lichen sclerosus**
R. Maglie, Marburg

10:25 **Pathogenicity of anti-desmoglein 3 IgA1 autoantibodies is Fc-dependent in IgA pemphigus**
S. Emtenani, Lübeck

10:40 **Pause**

Diagnostik/Biomarker von autoimmunbullösen Dermatosen

11:00 **Analysis of the diagnostic value and practicability of serration pattern analysis by direct immunofluorescence microscopy in pemphigoid diseases**
Maike Marleen Holtsche, Lübeck

11:15 **Multiparametric characterization of T and B cell subsets in pemphigus vulgaris**
C. Baum, Marburg

11:30 **Monitoring of autoreactive T cells in patients with pemphigus.**
Robert Pollmann, Marburg

Therapie von autoimmunbullösen Dermatosen

11:45 **Screening identifies novel treatment targets for pemphigus**
I.A. Burmester, Lübeck

12:00 **The *Ornithodoros moubata* soft-tick-derived lipocalin Coversin abrogates skin inflammation in a murine model of pemphigoid diseases by sequestering complement factor C5 and leukotriene B4**
Tanya Sezin, Lübeck

12.:15 **Aktualisierung der S2k-Leitlinie Diagnostik und Therapie von Pemphigus/Pemphigoid**
Enno Schmidt, Lübeck

12:30 **Zusammenfassung, Verabschiedung**
